PROFESSIONAL SUMMARY

Data Engineer with 4+ years of experience designing and building scalable data pipelines, ETL/ELT workflows, and cloud-based data platforms. Proficient in Python, SQL, PySpark, Azure Databricks, Apache Spark, Delta Lake, and Apache Kafka. Hands-on experience with AI/ML applications including OCR automation, LLM-based data extraction using LangChain and OpenAI APIs, and RAG architectures. Experienced across AWS, Azure, and GCP with strong skills in data modeling, data quality, and delivering analytics solutions using Power BI and Tableau.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Spark SQL, T-SQL, Scala, Shell Scripting, PowerShell

Big Data and Processing: Apache Spark, PySpark, Azure Databricks, Delta Lake, Apache Kafka, Apache Airflow, dbt, Hadoop, MapReduce

Cloud Platforms: Azure (ADLS Gen2, Azure Data Factory, Azure Databricks, Synapse Analytics, Key Vault, Event Hubs), AWS (S3, Glue, EMR, Redshift, Lambda, Kinesis), GCP (BigQuery, Cloud Storage, Cloud Functions, Dataflow)

Data Architecture: Lakehouse Architecture, Bronze/Silver/Gold Layers, Medallion Architecture, Dimensional Modeling, Star Schema, Snowflake Schema, SCD Type 1 and 2, Data Warehouse Design, Data Marts, Data Lakes

Databases: Snowflake, PostgreSQL, SQL Server, Oracle, MySQL, MongoDB, CouchbaseDB, Redis, Delta Lake, DynamoDB

AI and ML: LangChain, OpenAI APIs, RAG (Retrieval-Augmented Generation), Google Document AI, Google Cloud Vision (OCR), LLM-Based Data Extraction, Prompt Engineering, Azure OpenAI, Embeddings, Vector Databases

BI and Visualization: Power BI (DAX, Power Query, Microsoft Fabric), Tableau, Looker, Apache Superset, Excel, Data Visualization, Dashboards, Enterprise Reporting

DevOps and Tools: Git, CI/CD, Azure DevOps, GitHub, Docker, Kubernetes, Terraform, JIRA, Agile, Scrum, Unit Testing, Integration Testing

Data Quality and Governance: Data Validation, Data Quality Frameworks, Anomaly Detection, Data Lineage, Monitoring, Alerting, Data Governance, Access Controls, Documentation

PROFESSIONAL EXPERIENCE

Xiphoid Inc

Jan 2025 - Present

Data Engineer

- Designed and built scalable ETL/ELT data pipelines on Azure Databricks using Apache Spark, PySpark, and Delta Lake with Medallion Architecture (Bronze, Silver, Gold layers), handling 10TB+ of daily data ingestion and transformation.
- Built end-to-end document ingestion and OCR pipelines using Google Document AI and Google Cloud Vision to extract structured data from millions of legacy documents, improving extraction accuracy by 40%.
- Developed LLM-based data extraction workflows using LangChain and OpenAI APIs, converting unstructured OCR output into structured datasets for downstream analytics and reporting.
- Implemented data quality frameworks including validation logic, anomaly detection, monitoring, and alerting - reducing production data incidents by 35%.
- Collaborated with data scientists, analysts, and business stakeholders to deliver Power BI dashboards and analytics solutions supporting operational decision-making.

5Data Inc

Dec 2021 - May 2023

Data Engineer

- Built and maintained ETL/ELT data pipelines on AWS (S3, Glue, EMR, Redshift) and Azure ingesting data from relational databases, SaaS APIs, and streaming sources into centralized data warehouses.
- Engineered real-time Apache Kafka and Spark Streaming pipelines processing 1M+ events per second alongside 30+ Apache Airflow DAGs for batch workloads.
- Designed dimensional data models (star schema, SCD Type 2) for ESG and GHG emissions reporting supporting consistent, auditable metrics for global enterprise clients.
- Developed Power BI and Tableau dashboards used by 200+ stakeholders - reducing reporting latency by 25% through optimized data transformations and semantic model design.

IBaseIT Software Solutions

Jan 2021 - Dec 2021

Data Engineer

- Built Python and SQL-based ETL automation workflows across 50+ client projects, reducing manual processing time by 60% through reusable scripting patterns and validation logic.
- Developed RPA automation solutions using Power Automate and UiPath to automate document processing and ETL workflows, ensuring consistent and accurate data ingestion into client systems.

EDUCATION

Master's, Computer Science - Florida Atlantic University

2024
