PROFESSIONAL SUMMARY

Data Engineer with 4+ years building data pipelines, backend services, and LLM-powered workflows. Proficient in Python, Airflow, AWS, and service-oriented architectures. Hands-on with LLMs, RAG, and prompt engineering applied to real-world data workflows. Builds scalable, automated systems with a strong bias toward ownership and reliability.

PROFESSIONAL EXPERIENCE

Xiphoid Inc

Jan 2025 - Present

Data Engineer

- Designed and built data pipelines and ETL workflows that ingest, transform, and deliver data to downstream products and teams using Python, Airflow, and AWS.
- Applied LLMs and prompt engineering to real-world workflows — built RAG pipelines and LLM-powered data extraction using LangChain and OpenAI APIs. Used AI-assisted development tools including Claude Code and GitHub Copilot to accelerate delivery.
- Designed and built REST APIs and backend services supporting data-driven products. Developed new data schemas and warehouse structures on Azure Databricks and Delta Lake. Improved pipeline efficiency by 40%.
- Built automated validation and monitoring layers. Triaged and resolved production issues quickly. Reduced data incidents by 35%.
- Partnered with team leads across the organization to build and iterate on performance metrics and reporting pipelines. Worked with high ownership in a fast-moving environment.

5Data Inc

Dec 2021 - May 2023

Data Engineer

- Built and operated data pipelines and ETL workflows on AWS using Python and Airflow. Designed scalable data models and warehouse schemas supporting analytics and product teams. Reduced latency by 25%.
- Built REST APIs and backend data services for 200+ internal users. Applied strong analytical thinking to automate repetitive data processes and improve pipeline scalability and reliability.
- Partnered with team leads to iterate on existing pipelines and performance metrics. Operated with high ownership in a fast-paced environment.

IBaseIT Software Solutions

Jan 2021 - Dec 2021

Data Engineer

- Built Python data pipelines and backend services across 50+ client projects. Applied ETL workflows, data modeling, and automation. Reduced processing time by 60%.

TECHNICAL SKILLS

Core: Python, SQL, Airflow, AWS (S3, Glue, Lambda, Redshift, EMR), REST APIs, Service-Oriented Architecture

AI and LLMs: LangChain, OpenAI APIs, RAG, Prompt Engineering, LLM-Powered Workflows, Claude Code, GitHub Copilot, Cursor

Data and Warehousing: Data Pipelines, ETL/ELT, Data Modeling, Scalable Architecture, Databricks, Snowflake, PostgreSQL, Elasticsearch, Delta Lake

Tools: Git, Docker, CI/CD, dbt, JIRA, Agile, Shell Scripting

EDUCATION

Master's, Computer Science - Florida Atlantic University

May 2023 - Dec 2024
